Dennis Kulwicki
(President)

Rick Carlson
(Vice-President)

Sue Cole
(Secretary)

Diane Henkel
(Treasurer)

Jim Schnolis
(Trail Master)

President's Message

Merry Christmas! Merry Christmas! Merry Christmas! My favorite, most joyous time of the year. Everyone is so up-spirited, happy, and kind. I enjoy all the decorations, and of course, Santa Claus. And this year, pretty much just celebrating with family and small groups. Along with the real meaning of Christmas!

Now all we need is for Santa Claus and Old Man Winter to get together and send us some **snow and a white Christmas!** It would be pretty nice to go sledding during the holiday week. Snowmobiling is one

Meeting Notes

You can't count this year as even being meaningful. At both our July and September meetings, we didn't have enough people to hold an official meeting. We merely went through the agenda with no official business being conducted. However, be rest assured that all the back office functions, liabilities, registrations, and invoices have been professionally taken care of. We are up-to-speed on everything! The trail brushing and signing went well, our trail has been

sport that is outside, and you can follow the 'China' virus guidelines (i.e., social distancing, a mask, hand sanitizing, etc.) and as sledders, we wear helmets.

Hopefully, this year we get our fair share of **'snow'**. It should be a whole lot better this year on the trails in our immediate club riding area. Some of the marshy areas have dried up a bit and with cold weather they should begin to freeze-over giving access to areas that have been shut down for the past few wet weather years. It is that time of year again to think about the

GPS'd (and is 8.1 miles long), the grooming sled has been totally refurbished and the tractor will be picked up from Scott Kottowski. So....we will be all set for grooming when the snow flies. THANKS Jimmy Schnolis! Scott is donating his tractor again this year to our club at no charge. THANK YOU, Scott Kottowski!

New maps will be out shortly for all of Adams County. Steve McIntosh (Dellwood/Moundview Club) is now the Vice-

lake. It always worries me, so I want to continue to make people aware and caution them about sledding on ice on **any** lake or river. Please take the time to review the **ICE Guidelines** in this newsletter.

As always, we are trying to create interest and enthusiasm in our club. If you have not sent in your renewal yet, what are you waiting for? And welcome to all new Club members!

On behalf of our club officers and board of directors, I would like to wish everyone a very **Merry Christmas and a Happy New Year!**
Think Snow! Lets's Ride!

president of the Adams County Snowmobile Association. He headed up the map committee and together, they created a great snowmobile map. It has zones on it, has been updated, been canvassed with businesses, and has easy-to-follow trails well marked.

The Castle Rock Pink Ribbon Ride is January 16, 2021. Registration & staging is at 9:30 am. at Mound View Golf Course Bar & Grill.
-Sue Cole

Remember Safety Always Comes First!

ICE SAFETY GUIDELINES:

ICE THAT IS 2"
OR LESS
IS UNSAFE TO WALK ON.
STAY AWAY
FROM THIN ICE!

2"

ICE THAT IS 4"
OR MORE
IS OKAY TO WALK ON

4"

ICE THAT IS 6"
OR MORE
IS OKAY TO DRIVE
SNOWMOBILES
OR ATV'S ON

6"

ICE THAT IS 12"
OR MORE
IS OKAY TO DRIVE
SMALL CARS ON

12"

ICE THAT IS 15"
OR MORE
IS OKAY TO DRIVE
MEDIUM SIZED
TRUCKS ON

15"

THERE IS NO SUCH THING AS 100% SAFE ICE!!!

Did you know?

- Ice always forms unevenly. It can be 2 feet thick in one spot, and just a few inches thick a couple feet away.
- The most dangerous ice is formed over flowing water. It's especially dangerous near streams, culverts and bridges. Also, the faster the water is running, usually means the weaker the ice will be.
- Snow insulates the ice and slows the freezing process. The added weight of the snow reduces the strength of the ice. Also, ice that is closer to shore is usually weaker than ice farther out.
- Cracking and rumbling ice isn't always bad. The ice expands and contracts as the temperature rises and falls.
- Fish and birds/wildlife can also effect the ice. Schools of fish can bring warm water from the bottom of lakes, and open holes in seemingly thick ice.
- **ALWAYS BE CAUTIOUS WHEN YOU ARE ON ICE!**

MERRY CHRISTMAS
